Idaho Cleanup Project (ICP) End State Contract

The purpose of this modification is to award work scope under Task Order 3.2 to support the shipment of Missouri University Research Reactor (MURR) fuel elements to the Savannah River Site (SRS) to support fuel recovery in accordance with the Trump Administration's priorities. Mod P00127 was a unilateral change order to include a Not-to-Exceed (NTE) of \$500K. This NTE allowed the Contractor to start the scope for this while the proposal was being developed (CLN260348). See below for further details.

(4) Task Order 3.2 Attachment entitled, *Performance Evaluation Measurement Plan (PEMP)*.

(i) The Contracting Officer (CO) will unilaterally issue a PEMP for each evaluation period that establishes the criteria and procedures for evaluating the Contractor's performance for the purpose of determining fee earned. The PEMP may be revised unilaterally by the CO at any time during the evaluation period. While the PEMP incentives may be unilaterally developed by the Department of Energy (DOE), the expectation is that a teaming approach between DOE ICP and the Contractor will be used. The PEMP will include, as a minimum, the following:

(A) Evaluation criteria linked to the contract's performance objectives as defined in terms of cost, schedule, technical, or other contract performance requirements or objectives.

(B) Means of how the Contractor's performance will be measured against the evaluation criteria.

(C) Fee evaluation period.

(D) Amount of the total annual available fee that is allocated to the evaluation period, including the allocation for subjective award fee criteria and objective award fee criteria.

(E) Methodology for application of subjective evaluation ratings or attainment of predetermined objectives to earned fee.

(F) Use of rollover of unearned fee is prohibited.

(ii) The length of evaluation periods will align to the 12-month Government fiscal year (FY). The evaluation periods should provide a balance between the Contractor's ability to have sufficient performance time for the Government to evaluate, but evaluation periods should provide the ability for the Government to provide timely evaluations on the Contractor's performance without being administratively burdensome.

(5) Fee Determination. Fee decisions are made solely at the discretion of the Government, including but not limited to, the characterization of the Contractor's performance, amount of earned fee, if any, and the methodology used to calculate the earned fee.

(6) Unsatisfactory Performance. In accordance with FAR 16.401, award fee shall not be earned if the contractor's overall cost, schedule, and technical performance in the aggregate is below satisfactory. The basis for all award-fee determinations shall be documented in the contract file to include, at a minimum, a determination that overall cost, schedule and technical performance in the aggregate is or is not at a satisfactory level. This determination and the methodology for determining the award fee are unilateral decisions made solely at the discretion of the Government.

(7) Total Available Fee Distribution. Table B-4 delineates the Total Available Award Fee Distribution as fee allocations, contract definitization, and final fee determinations are made for each fiscal year.

(8) Task Order 3.2 Description:

Task Order 3.2, Integration and Mission Continuity (IMC), includes uninterrupted operations of work scope identified in Section C, while both parties work towards the development of individual End States. Timing for preparation of the End State subtasks will be dependent on the DOE’s priority for the work scope, and End State subtasks will be developed and sequenced collaboratively as defined in the most current Ten-Year End State Strategic Task Order Plan.

As the End State subtasks are developed, negotiated, and implemented, Task Order 3.2, IMC, will continue to house the core programs that maintain a comprehensive and effective continuity capability across ICP projects to support achievement of defined End States. Task Order 3.2 scope shall be performed in accordance with the Section C PWS sections of the Master IDIQ Contract, identified below. Costs are reimbursed based on allowable actual costs billed to the Task Order 3.2.

B.4 DOE-B-2013 Obligation of Funds (Oct 2014)

- (a) Pursuant to the clause of this contract in FAR 52.232-22, *Limitation of Funds*, total funds in the amount(s) of \$(see current funding modification and accompanying detailed funding profile) are obligated for the payment of allowable costs.

Obligated funding shall only be used for the specific subtasks as designated in the Hybrid Task Order and shall not be used for any other subtask.
